## SUMMARY

---

Full-Stack Software Engineer (Diploma in Computer Engineering) with proven experience in back-end development, cloud deployment, and modern web technologies. Skilled in building scalable dashboards, CRMs and real-time applications using Java, Python, PHP (Laravel), and the MERN stack (MongoDB, Express.js, React.js, Node.js). Expert in API integration, database optimization, and cloud hosting (AWS). Passionate about delivering high-performance, user-focused solutions while collaborating in Agile/Scrum teams.

## WORK EXPERIENCE

---

### Whizzact Solution

June 2021 - Nov 2022

Collaborated directly with clients through in-person and online meetings to gather requirements, discuss progress, and deliver solutions that meet business needs. Gained hands-on experience working on live production systems, contributing to real-time problem solving and feature enhancements. Actively participated in the full development cycle, from requirement analysis to coding, testing, and deployment.

Strengthened professional skills in client communication, teamwork, and agile collaboration, working closely with senior engineers and cross-functional teams.

### Avinya Productry Technologies

Mar 2023 – Jul 2023

At Avinya, I worked as a Software Developer where I led the design and deployment of scalable web applications on AWS and collaborated with cross-functional teams to deliver high-quality solutions. I was responsible for building responsive, SEO-friendly user interfaces, developing secure and modular backend systems, and ensuring smooth integration between different components of the product. This role strengthened my expertise in cloud-based development, modern front-end technologies, and back-end frameworks while enhancing my ability to work in agile sprints, follow best coding practices, and deliver reliable and production-ready applications.

## PROJECTS

---

### Tradeverse Dashboard WebApp

Developed and implemented the Tradeverse Web Dashboard and Order Execution Module using PHP Laravel, Python, Java, AWS, and Selenium, enabling scalable management of stock market accounts and efficient multi-account order execution. Integrated and synchronized real-time data from Zerodha and Angel APIs, ensuring accurate and timely execution. Improved dashboard performance by 60%

## EDUCATION

---

2021 Diploma In Computer Science - Anjuman Polytechnic, Nagpur

2017 SSC - Dinbai High School Digras

## SKILLS

---

**Backend:** Java, Python, Node.js, Express.js, PHP, Laravel

**Frontend:** React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind

**Cloud/Server:** AWS (EC2, S3, Route 53), cPanel, RDP ,N8N Workflow

**DevOps/Tools:** Git, GitHub, Selenium, Cron jobs, Agile/Scrum

**Soft Skills:** Team Collaboration, Problem Solving, Bias for Action, Delivering Results
